

BELT DRIVE

PROFESSIONAL SERIES

Air technology system.

COMPACT EASY 4-5-7
COMPACT TWIN 4-5-7 & VSD
ROTARY SCREW COMPRESSORS
FIXED AND VARIABLE SPEED

KTC
EXCELLENCE IN COMPRESSED AIR

COMPACT EASY 4-5-7

- Best performance low energy costs
- Designed as a industrial compressor
- Efficient cooling system
- Best performance in just a small amount of space
- Great compactness

- Electronic controller as standard with load/unload system
- Super silenced
- All-inclusive system fully integrated in aluminum case
- Fast and economical maintenance
- Anti-condensation system
- **KTRONIC 10**
Available on "VSD" version with variable speed inverter drive (Twin)

COMPACT TWIN 4-5-7 & VSD

- **KTRONIC 8** available on-off version.

Pressure switch control.

INTEGRATED AIR-END

The range of screw compressors **COMPACT** 4-5-7 is equipped with the most compact air pumping unit available in the market ADAM 60 L integrating the main components of a screw compressor (air-end unit, separation sump, thermostatic valve, MPV and intake valve). High precision steel rotors with top class bearings equip an all in one compact aluminium body.

COMPACT EASY – COMPACT TWIN

Equipped with the latest generation patented VMC air-end technology, the range represents a significant improvement in efficiency and qualitative superiority due to the low environmental impact of the sound level, higher volumetric efficiency, and low maintenance costs compared to traditional piston compressors.

INNOVATION AND TECHNOLOGY DESIGNED FOR YOU
OUR DNA IS: INNOVATION.

COMPACT EASY is the best compressed air proposal to meet the needs of companies in all craft sectors and small industries. Energy efficiency and performance compared to traditional piston compressors make **COMPACT EASY** ideal for applications with compressed air requirements, where reliability and durability are essential.

The rotary technology of **VMC air-ends** offers significant advantages over piston compressors in terms of running costs, sustainability, performance, and reliability.

COMPACT VSD

COMPACT is a real revolution in the compressed air sector that allows you to offer the efficiency of an industrial screw compressor in the competitive market segments of silenced piston compressors. Equipped as standard with electronic controller, poly-v belt transmission, thermostatic valve automatic load/unload cycle, programmable stand-by timer, **COMPACT** range offers the best on the market to avoid condensation in the oil circuit with heating device as option. **VSD version available in 400 V and 230 V (1 and 3 phases)** for optimizing the energy consumption according to the real air demand with consistent costs saving (up to 50%).

MAIN FEATURES

- New generation VMC air end
- VMC suction and thermostatic valve
- Free Air Delivery (FAD)
- Superior performance with lower power consumption compared to a piston compressor
- Greater energy efficiency with limited CO2 emissions
- Lower sound level than a piston compressor
- Minimum maintenance costs
- Continuous operation
- Air cooler
- Oil cooler
- Simple to operate and manage
- Control with pressure switch (EASY)
- Control with an electronic controller (TWIN)

VARIANTS:

- Ground unit
- On 270 and 500lt tank
- With Dryer
- Tandem on 500 lt tank
