| Manufacturer                               | Airpress Polska Sp. z o.o. |
| Weight (kg)                                | 2 kg                       |
| Length (mm)                                | 253 mm (2.53 dm)           |
| Width (mm)                                 | 180 mm (1.8 dm)            |
| Height (mm)                                | 70 mm (7 cm)               |
| SKU  | 45456                      |
| Average air consumption at 6.3 bar (l/min) | 770 L/min (12.833 L/s)     |
| Consumption under load (L/min)             | 1044                       |
| Cutting wheel size (mm)                    | 125                        |
| Hose size (mm)                             | 13 mm                      |
| Power (kW)                                 | 1.050                      |
| Spindle thread                             | M14x2.0                    |
| Rounds per minute (RPM)                    | 12.000                     |
| Working pressure (bar)                     | 6.2                        |

## Description

The 45456 Airpress angle grinder is an extremely powerful grinder with a conversion capacity of more than 1050 watts. The reinforced rotor design is also used in harsh industrial environments. The multi-position side handle and the 9-position disc protector increase working comfort and safety. High power and speed of 12,000 rpm and a built-in speed controller make it possible to cut and grind steel, concrete or other building materials, also with diamond discs and heads.
