## Description

### K60 piston compressor pump

The K60 piston compressor pump is an advanced two-stage belt-driven pump equipped with four pistons. Manufactured in the European Union, it meets rigorous quality and safety standards, offering reliability and high performance in demanding working conditions.

The K60 model was designed for intensive use. The two-stage compression system guarantees efficiency and stability of operation. Cast iron cylinders, forged crankshafts and wide ribs ensure durability and resistance to overload. Large pulleys with oversized blades enable effective cooling during operation, ensuring reliability even under heavy loads.
